AI TOOLS & AGENTS

- Claude Code
- Cursor
- Codex
- OpenAI API
- Anthropic API
- Local LLMs
- LangChain
- Agentic Workflows
- Prompt Engineering
- RAG Systems

CORE TECH

- Java
- Spring Boot
- Angular
- PostgreSQL
- Docker
- Kubernetes
- AWS
- REST APIs
- CI/CD
- Test Driven Development
- SOLID principles

LANGUAGES

- | | |
|-----------|--------|
| Bulgarian | Native |
| English | Fluent |
| Russian | Fluent |

INTERESTS

- Table Tennis
- Climbing
- Skiing
- Chess

PROFILE

Full-stack engineer with 5+ years of enterprise experience — last year dedicated to mastering agentic AI development. I position myself as a 5–20× engineer by leveraging cutting-edge AI coding tools (Claude Code, Cursor, Codex) to build, ship, and iterate faster than traditional development cycles allow. My background spans payment systems, cloud infrastructure, and enterprise automation — now fully applied to LLM-powered products and agentic workflows.

EXPERIENCE

AI-Native Engineer AI FOCUS

Jan 2025 – Present

Independent / Freelance — Remote

- ▶ Built production-ready RAG pipelines and LLM-powered full-stack applications using OpenAI and Anthropic APIs.
- ▶ Developed and orchestrated multi-step LangChain agents for document processing and automated reasoning tasks.
- ▶ Benchmarked and evaluated local LLMs (Ollama, LM Studio) for cost/performance trade-offs in enterprise contexts.
- ▶ Operated at 5–20x engineering velocity using Claude Code as a primary development environment.

Software Developer

Oct 2022 – Dec 2024

Qaiware — Sofia, Bulgaria

- ▶ Developed and maintained Java/Spring Boot microservices for enterprise payment processing solutions.
- ▶ Led an internal LLM proof-of-concept, introducing AI tooling to the engineering organization.
- ▶ Collaborated in agile teams delivering high-availability backend systems with PostgreSQL and REST APIs.

Member of Technical Staff

Jul 2020 – Oct 2022

VMware (now Broadcom) — Sofia, Bulgaria

- ▶ Contributed to vRealize Automation — VMware's flagship cloud management and IaC platform.
- ▶ Worked with Kubernetes, Docker, and CI/CD pipelines in a large-scale enterprise cloud environment.
- ▶ Participated in code reviews, automated testing, and cross-team agile delivery cycles.

Tech Support

2018

Perfect Plus — VFS Global Visa Centers

- ▶ Provided technical support and operations for visa application processing centers.

EDUCATION

Bachelor's Degree in Informatics

2017 – 2022

Faculty of Mathematics and Informatics, Sofia University

High School of Mathematics

2012 – 2017

"Dr. Petar Beron" — Varna

PROJECTS & ACHIEVEMENTS

- ▶ Shipped multiple AI-powered full-stack applications combining LLM reasoning, RAG retrieval, and web interfaces.
- ▶ **Blockchain-based Dynamic Environment for Education** — BSc thesis project leveraging distributed ledger technology for credential verification and dynamic learning environments.
- ▶ **File Archivator using Huffman Coding** — Implemented lossless file compression in C++ as part of data structures coursework.
- ▶ **Awarded Athlete of the Year 2018** — Recognised for outstanding achievement in competitive table tennis.
